Dear Customer,

Important Information – Update regarding the ongoing Gas Main Replacement Works on - Lenton Road Nottingham

I would like to update you about the ongoing Cadent Gas Mains Replacement works currently underway on Lenton Road.

This work, which is being carried out by tRIIO® working on behalf of Cadent Gas, will move into the next phases and progress further along Lenton Road from 08th November 2017. We expect our works to continue for a further 4 weeks. We are working closely with the Nottingham Park Estate to ensure disruption is kept to a minimum for the residents of The Park during this essential works.

In order to complete these works safely it will be necessary to maintain the current section of road closed on Lenton Road and continue to extend our works outside the closure utilising normal signing, lighting and guarding until 15th November. From 16th November we intend to remove the aforementioned closure and install 4 Way Signals at Lenton Road junction Peveril Drive but closure the south/west exit/entry from this junction on Lenton Road.

Access to your property, for vehicles and pedestrians, will be maintained at all times via the advertised diversion route. On street parking will be maintained as close to your property as practical.

If the gas supply to your property is affected during our work, we will send you a separate letter detailing how you may be affected prior to our work starting.

Please be assured every effort will be made to minimise any inconvenience this essential work may cause and I would like to thank you for your patience and cooperation. If you would like further information, please contact us on 0800 096 5678.

Yours faithfully,

Cadent's Mains Replacement
Customer Team
